All historical writing is in a sense a history of the present, even when published by university presses. It is not just meticulously documented investigations; it also takes present concerns seriously. We in turn should take them seriously.

Four recent works on modern Italian history document the point nicely. Often needlessly overt and excessively thorough, they are all at the same time invaluable to those of us with unacademic interests in Fascism, the intricacies of Italian Socialism, and the role of both organized and unorganized Catholics in politics.

Of the four, George W. Baer's *The Coming of the Italian-Ethiopian War* is by reason of its subject matter—and the obvious fact that Italian colonial ambitions have been put to rest—the most academic. The analysis of Fascism is good but skeletal, and the contention that the invasion of Ethiopia is largely traceable to Mussolini's fears over growing unrest at home is hardly convincing. Indeed, a better case can be made for the contrary (which the author also alludes to) that the conflict was the direct result of monstrous self-confidence and an uncontrollable itch for *l'avventura*. In most other respects, however, one can take no exception to Baer's work. It is a persuasive indictment of the uncertainties and compromises of the diplomatic maneuvering that preceded the war—for which all powers, including ourselves, bear heavy responsibilities—and of a nationalism that inevitably reduced the League of Nations to a debating society.

But the Ethiopian War was merely a chapter in the history of Fascism. Of more immediate concern for us today is the persistence of a "Fascist" mentality—a craving for black and white judgments, an impatience with democratic procedures, and a shirking of civic responsibilities that appear in one form or another in virtually all political parties and among many individuals who profess to be "apolitical." This mentality, for all practical purposes, is the subject of Gianfranco Poggi's *Catholic Action in Italy*. Sociological jargon notwithstanding, the account of how Catholic action under Dr. Luigi Gedda's leadership, from 1945 to about 1955, substituted "Mussolini is always right" with "The Pope is always right" is fascinating, and hopefully, frightening. The book does not pretend to solve the peculiarly Italian problem of a pontiff who cannot help but be both spiritual and political leader. But there are hints of a solution in the account of revolt against Gedda's aims and techniques, in particular the revolt led by Mario Rossi, a left-wing Catholic who is representative of those Catholics working today in the Center-Left coalition.

Needless to say, the Communists, under Togliatti's leadership also exhibited a "Fascist" mentality. Their version was "Togliatti and Stalin are always right" for, in spite of occasional and tardive reservation, the Communist leader considered strict adherence to the party-line the prime requisite of political wisdom. It is a relief, therefore, to turn to John M. Cammett's *Antonio Gramsci and the Origins of Italian Communism*. There is very little in English on this far more independent, brilliant, and heroic Communist leader. Actually one might speak of three Gramsci's: the theorist of the *Ordine Nuovo*, an intellectual Socialist group in Turin in 1919-1920; the leader of the semi-clandestine Communist Party from 1921 to 1926; and the imprisoned Marxist intellectual who died in 1936. Cammett considers all three equally coherent and brilliant. But I am more impressed by Gramsci's individual analyses of Italian society and politics than by his basic coherence. Nonetheless, I cannot think of a better full-length study of Gramsci yet published in English.

In *Coexistence, Communism and Its Practice in Bologna, 1945-1965*, Robert H. Evans, in spite of reams of graphs and tables, offers a sprightly account of how the Communists won power there, how they keep it, and what their chances are of retaining it in the near future. Anyone with no previous knowledge of the "capitalist," indeed "petit-bourgeois" Communism of Bologna can do no better than read this work. A knowledge of Communism in Bologna is indispensable for an understanding of Italian Communism. It not only reveals much about a party whose ideology is supposedly distinct from that of its Socialist rivals, it offers, in these grim times, something resembling comic relief.

Serge Hughes

REVIEWERS

Thomas D. Corrigan is a priest in the archdiocese of Boston.

Harry W. Flannery is co-author of the recently published *Which Way Germany?*

Hilda Graef, well-known scholar, is the author of *Adult Christianity*.

Serge Hughes, professor of Italian at Hunter College, N.Y., is the author of the recently published *The Rise and Fall of Modern Italy*.

Nathan Kravetz, associate professor of education at Lehman College, City University of N.Y., has worked in Peru with the U.S. Aid mission and in Chile as a Ford Foundation consultant on educational reform.

James R. Laurie is a graduate student in history at Trinity University, San Antonio, Texas.

Robert A. McDermott teaches philosophy of religion at Manhattanville.

Sister Mary Paul is a doctoral candidate in social work at Columbia University.

Bernard Murchland, who teaches philosophy at Ohio Wesleyan, edited the recent *The Meaning of the Death of God*.

Robert C. Neville, associate professor of philosophy at Fordham University, is the author of the recently published *God the Creator*.

George N. Shuster is assistant to the president of the University of Notre Dame.

George H. Szanto is assistant professor of German and comparative literature at the University of California, San Diego.

Barry Wallenstein teaches English at City College.
